(QUARTERLY) PRODUCTION (OF GARMENTS)
(Selected Items)

Price 25 cents

First and Second Quarters, 1951

The Dominion Bureau of Statistics resumes herewith the publication of quarterly reports showing the current production of selected items in the secondary textile field. The last quarterly report published dealt with the first and second quarters of 1947 and, although quarterly reports will not be issued to cover the intervening period, data on commodities produced in this field are or will be available on an annual basis from the annual reports on manufacturing.

All products listed are arranged to show the detail on a regional basis without divulging particulars of the firms submitting reports. It is to be noted that all data are compiled on a commodity basis, irrespective of industrial classification, and that they are to be considered as preliminary and subject to revision.

(Selected Items)

Third and fourth quarters, 1951

The Dominion Bureau of Statistics publishes herewith a report on the current production of selected items in the secondary textile field, for the third and fourth quarters of 1951.

It is to be noted that all data are compiled on a commodity basis, irrespective of industrial classification, and that they are to be considered as preliminary and subject to revision.

CLOTHING PRODUCTION

(Selected Items)

FIRST QUARTER 1963

Periodic reviews are made by officers of the Industry Division of all surveys carried out by the Division. These reviews are designed in general to investigate such matters as quality and timeliness of the data and in addition to ensure that the information collected is in keeping with the current practices of industry and is of maximum usefulness.

An extensive review of this survey has been undertaken and, as a result, certain changes have been made which have delayed the publication of this quarterly report. Briefly, these changes have involved a new method of estimation for non-response, which has always been a problem in this survey, and an expansion of coverage.

The effects of these changes will generally result in a decrease of the detail previously shown, but in an improvement in the accuracy of the data presented. Since these changes also mean that the 1962 data are, generally speaking, not comparable, these have not been shown.

Recent requests for additional statistical data in this field have been made to the Bureau and in order to meet requirements as fully as possible and at the same time review survey procedures, a meeting of interested parties will be held at the Bureau within the next few months.

In the meantime, the survey will be continued for the remaining three quarters of 1963 on the new basis.

GARMENT PRODUCTION

(Selected Items)

SECOND QUARTER 1963

Periodic reviews are made by officers of the Industry Division of all surveys carried out by the Division. These reviews are designed in general to investigate such matters as quality and timeliness of the data and in addition to ensure that the information collected is in keeping with the current practices of industry and is of maximum usefulness.

An extensive review of this survey has been undertaken and, as a result, certain changes have been made which have delayed the publication of this quarterly report. Briefly, these changes have involved a new method of estimation for non-response, which has always been a problem in this survey, and an expansion of coverage.

The effects of these changes will generally result in a decrease of the detail previously shown, but in an improvement in the accuracy of the data presented. Since these changes also mean that the 1962 data are, generally speaking, not comparable, these have not been shown.

Recent requests for additional statistical data in this field have been made to the Bureau and in order to meet requirements as fully as possible and at the same time review survey procedures, a meeting of interested parties will be held at the Bureau within the next few months.

In the meantime, the survey will be continued for the remaining two quarters of 1963 on the new basis.

GARMENT PRODUCTION

(Selected Items)

THIRD QUARTER 1963

Periodic reviews are made by officers of the Industry Division of all surveys carried out by the Division. These reviews are designed in general to investigate such matters as quality and timeliness of the data and in addition to ensure that the information collected is in keeping with the current practices of industry and is of maximum usefulness.

An extensive review of this survey has been undertaken and, as a result, certain changes have been made which have delayed the publication of this quarterly report. Briefly, these changes have involved a new method of estimation for non-response, which has always been a problem in this survey, and an expansion of coverage.

The effects of these changes will generally result in a decrease of the detail previously shown, but in an improvement in the accuracy of the data presented. Since these changes also mean that the 1962 data are, generally speaking, not comparable, these have not been shown.

Recent requests for additional statistical data in this field have been made to the Bureau and in order to meet requirements as fully as possible and at the same time review survey procedures, a meeting of interest parties is being held at the Bureau this month.

In the meantime, the survey will be continued under the new basis, for the remaining quarter of the year.

GARMENT SHIPMENTS

(Formerly Garment Production)

FIRST QUARTER 1964

As mentioned in the interim 1963 reports in this series, certain changes have taken place in this survey, effective with this issue. As a result of meetings with the relevant trade associations, it has been changed to a shipments survey and additional commodity items have been added, leading to an increase in the number of firms surveyed.

Since non-response has always been a problem in this survey, a more extensive follow-up procedure, including active liaison with the main trade associations in this field, was also adopted. This new approach resulted in a greater response than heretofore with about 85 per cent of the total number of firms completing the questionnaire. The remaining 15 per cent was estimated on the basis of previous annual data collected.

GARMENT SHIPMENTS

(Formerly Garment Production)

SECOND QUARTER 1964

As mentioned in the interim 1963 reports in this series, certain changes have taken place in this survey, effective with this issue. As a result of meetings with the relevant trade associations, it has been changed to a shipments survey and additional commodity items have been added, leading to an increase in the number of firms surveyed.

Since non-response has always been a problem in this survey, a more extensive follow-up procedure, including active liaison with the main trade associations in this field, was also adopted. This new approach resulted in a greater response than heretofore with about 82 per cent of the total number of firms completing the questionnaire. The remaining 18 per cent was estimated on the basis of previous annual data collected.

GARMENT SHIPMENTS

(Formerly Garment Production)

THIRD QUARTER 1964

As mentioned in the interim 1963 reports in this series, certain changes have taken place in this survey, effective with this issue. As a result of meetings with the relevant trade associations, it has been changed to a shipments survey and additional commodity items have been added, leading to an increase in the number of firms surveyed.

Since non-response has always been a problem in this survey, a more extensive follow-up procedure, including active liaison with the main trade associations in this field, was also adopted. This new approach resulted in a greater response than heretofore with about 81 per cent of the total number of firms completing the questionnaire. The remaining 19 per cent was estimated on the basis of previous annual data collected.

GARMENT SHIPMENTS

(Formerly Garment Production)

FOURTH QUARTER 1964

As mentioned in the interim 1963 reports in this series, certain changes have taken place in this survey, effective with this issue. As a result of meetings with the relevant trade associations, it has been changed to a shipments survey and additional commodity items have been added, leading to an increase in the number of firms surveyed.

Since non-response has always been a problem in this survey, a more extensive follow-up procedure, including active liaison with the main trade associations in this field, was also adopted. This new approach resulted in a greater response than heretofore with about 79 per cent of the total number of firms completing the questionnaire. The remaining 21 per cent was estimated on the basis of previous annual data collected.

GARMENT SHIPMENTS

FIRST QUARTER 1965

As mentioned in the interim 1964 reports in this series, certain changes have taken place in this survey, effective with the 1964 Survey year. As a result of meetings with the relevant trade associations, it has been changed to a shipments survey and additional commodity items have been added, leading to an increase in the number of firms surveyed.

Since non-response has always been a problem in this survey, a more extensive follow-up procedure, including active liaison with the main trade associations in this field, was also adopted. This new approach resulted in a greater response than heretofore with about 76 per cent of the total number of firms completing the questionnaire. The remaining 24 per cent was estimated on the basis of previous annual data collected.

GARMENT SHIPMENTS

SECOND QUARTER 1965

As mentioned in the interim 1964 reports in this series, certain changes have taken place in this survey, effective with the 1964 Survey year. As a result of meetings with the relevant trade associations, it has been changed to a shipments survey and additional commodity items have been added, leading to an increase in the number of firms surveyed.

Since non-response has always been a problem in this survey, a more extensive follow-up procedure, including active liaison with the main trade associations in this field, was also adopted. This new approach resulted in a greater response than heretofore with about 66 per cent of the total number of firms completing the questionnaire. The remaining 34 per cent was estimated on the basis of previous annual data collected.

GARMENT SHIPMENTS

THIRD QUARTER 1965

As mentioned in the interim 1964 reports in this series, certain changes have taken place in this survey, effective with the 1964 Survey year. As a result of meetings with the relevant trade associations, it has been changed to a shipments survey and additional commodity items have been added, leading to an increase in the number of firms surveyed.

Since non-response has always been a problem in this survey, a more extensive follow-up procedure, including active liaison with the main trade associations in this field, was also adopted. This new approach resulted in a greater response than heretofore with about 71.3 per cent of the total number of firms completing the questionnaire. The remaining 28.7 per cent was estimated on the basis of previous annual data collected.

GARMENT SHIPMENTS

FOURTH QUARTER 1965

Effective this quarter, a new system of estimating shipments of non-respondents was adopted and incorporated with the data of reporting respondents resulting in the figures presented.

The "value of shipments" as reported to the 1964 Annual Census of Manufactures was used as a base for estimating the shipments of non-respondents.

The total annual "value of shipments" of the non-respondents was seasonally adjusted for the quarter under review from pre-determined factors established from historical data available. Also, fabric distribution of the estimated shipments was calculated on the basis of the current reporting firms.

In analysing the response to this survey for the quarter under review, the "value of shipments" of the reporting firms, as reported on their 1964 Annual Census of Manufactures, has been related in total to the "value of shipments" of all manufacturers. The resulting percentages listed below therefore indicate the representation of the reporting firms to the complete industry in 1964.

Women's and Misses, 73.4%; Children's under 14, 64.7%, Men's and Youth's; 72.3%; and Boys' 68.2%.

GARMENT SHIPMENTS

FIRST QUARTER 1966

Effective this quarter, a new system of estimating shipments of non-respondents was adopted and incorporated with the data of reporting respondents resulting in the figures presented.

The "value of shipments" as reported to the 1964 Annual Census of Manufactures was used as a base for estimating the shipments of non-respondents.

The total annual "value of shipments" of the non-respondents was seasonally adjusted for the quarter under review from pre-determined factors established from historical data available. Also, fabric distribution of the estimated shipments was calculated on the basis of the current reporting firms.

In analysing the response to this survey for the quarter under review, the "value of shipments" of the reporting firms, as reported on their 1964 Annual Census of Manufactures, has been related in total to the "value of shipments" of all manufacturers. The resulting percentages listed below therefore indicate the representation of the reporting firms to the complete industry in 1964.

Women's and Misses, 81.5%; Children's under 14, 71.6%, Men's and Youth's; 80.4%; and Boys' 73.6%.

GARMENT SHIPMENTS

SECOND QUARTER 1966

Effective March 1966 quarter, a new system of estimating shipments of non-respondents was adopted and incorporated with the data of reporting respondents resulting in the figures presented.

The "value of shipments" as reported to the 1964 Annual Census of Manufactures was used as a base for estimating the shipments of non-respondents.

The total annual "value of shipments" of the non-respondents was seasonally adjusted for the quarter under review from pre-determined factors established from historical data available. Also, fabric distribution of the estimated shipments was calculated on the basis of the current reporting firms.

In analysing the response to this survey for the quarter under review, the "value of shipments" of the reporting firms, as reported on their 1964 Annual Census of Manufactures, has been related in total to the "value of shipments" of all manufacturers. The resulting percentages listed below therefore indicate the representation of the reporting firms to the complete Industry in 1964.

Women's and Misses, 79.4%; Children's under 14, 76.9%; Men's and Youth's, 80.0%; and Boys' 74.8%.

GARMENT SHIPMENTS

THIRD QUARTER 1966

Effective March 1966 quarter, a new system of estimating shipments of non-respondents was adopted and incorporated with the data of reporting respondents resulting in the figures presented.

The "value of shipments" as reported to the 1964 Annual Census of Manufactures was used as a base for estimating the shipments of non-respondents.

The total annual "value of shipments" of the non-respondents was seasonally adjusted for the quarter under review from pre-determined factors established from historical data available. Also, fabric distribution of the estimated shipments was calculated on the basis of the current reporting firms.

In analysing the response to this survey for the quarter under review, the "value of shipments" of the reporting firms, as reported on their 1964 Annual Census of Manufactures, has been related in total to the "value of shipments" of all manufacturers. The resulting percentages listed below therefore indicate the representation of the reporting firms to the complete industry in 1964.

Women's and Misses, 79.1%; Children's under 14, 72.8%; Men's and Youth's, 80.6%; and Boys' 75.4%.

GARMENT SHIPMENTS

FOURTH QUARTER 1966

Effective March 1966 quarter, a new system of estimating shipments of non-respondents was adopted and incorporated with the data of reporting respondents resulting in the figures presented.

The "value of shipments" as reported to the 1964 Annual Census of Manufactures was used as a base for estimating the shipments of non-respondents.

The total annual "value of shipments" of the non-respondents was seasonally adjusted for the quarter under review from pre-determined factors established from historical data available. Also, fabric distribution of the estimated shipments was calculated on the basis of the current reporting firms.

In analysing the response to this survey for the quarter under review, the "value of shipments" of the reporting firms, as reported on their 1964 Annual Census of Manufactures, has been related in total to the "value of shipments" of all manufacturers. The resulting percentages listed below therefore indicate the representation of the reporting firms to the complete Industry in 1964.

Women's and Misses, 75.8%; Children's under 14, 71.0%; Men's and Youth's, 78.8%; and Boys' 80.1%.

GARMENT SHIPMENTS

FIRST QUARTER 1967

Effective March 1966 quarter, a new system of estimating shipments of non-respondents was adopted and incorporated with the data of reporting respondents resulting in the figures presented.

The "value of shipments" as reported to the 1964 Annual Census of Manufactures was used as a base for estimating the shipments of non-respondents.

The total annual "value of shipments" of the non-respondents was seasonally adjusted for the quarter under review from pre-determined factors established from historical data available. Also, fabric distribution of the estimated shipments was calculated on the basis of the current reporting firms.

In analysing the response to this survey for the quarter under review, the "value of shipments" of the reporting firms, as reported on their 1964 Annual Census of Manufactures, has been related in total to the "value of shipments" of all manufacturers. The resulting percentages listed below therefore indicate the representation of the reporting firms to the complete industry in 1964.

Women's and Misses', 76.8%; Children's under 14, 69.5%; Men's and Youth's, 78.1%; and Boys' 74.4%.

GARMENT SHIPMENTS

SECOND QUARTER 1967

Price: 25 cents, \$1.00 a year

Effective March 1966 quarter, a new system of estimating shipments of non-respondents was adopted and incorporated with the data of reporting respondents resulting in the figures presented.

The "value of shipments" as reported to the 1965 Annual Census of Manufactures was used as a base for estimating the shipments of non-respondents.

The total annual "value of shipments" of the non-respondents was seasonally adjusted for the quarter under review from pre-determined factors established from historical data available. Also, fabric distribution of the estimated shipments was calculated on the basis of the current reporting firms.

In analysing the response to this survey for the quarter under review, the "value of shipments" of the reporting firms, as reported on their 1965 Annual Census of Manufactures, has been related in total to the "value of shipments" of all manufacturers. The resulting percentages listed below therefore indicate the representation of the reporting firms to the complete industry in 1965.

Women's and Misses', 74.0%; Children's under 14, 67.1%; Men's and Youth's, 78.0%; and Boys' 68.3%.

DOMINION BUREAU OF STATISTICS

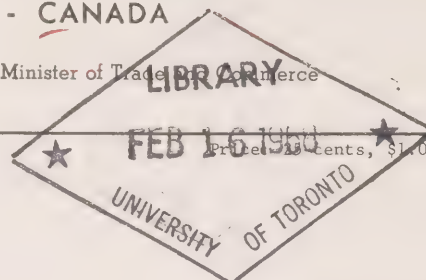

OTTAWA - CANADA

Published by Authority of the Minister of Trade and Commerce

Vol. 17, No. 3

GARMENT SHIPMENTS

THIRD QUARTER 1967

Price: 10 cents, \$1.00 a year

Effective March 1966 quarter, a new system of estimating shipments of non-respondents was adopted and incorporated with the data of reporting respondents resulting in the figures presented.

The "value of shipments" as reported to the 1965 Annual Census of Manufactures was used as a base for estimating the shipments of non-respondents.

The total annual "value of shipments" of the non-respondents was seasonally adjusted for the quarter under review from pre-determined factors established from historical data available. Also, fabric distribution of the estimated shipments was calculated on the basis of the current reporting firms.

In analysing the response to this survey for the quarter under review, the "value of shipments" of the reporting firms, as reported on their 1965 Annual Census of Manufactures, has been related in total to the "value of shipments" of all manufacturers. The resulting percentages listed below therefore indicate the representation of the reporting firms to the complete industry in 1965.

Women's and Misses', 79.0%; Children's under 14, 69.1%; Men's and Youth's, 77.7%; and Boys' 61.4%.

CLOTHING SHIPMENTS

FOURTH QUARTER 1967

Effective March 1966 quarter, a new system of estimating shipments of non-respondents was adopted and incorporated with the data of reporting respondents resulting in the figures presented.

The "value of shipments" as reported to the 1965 Annual Census of Manufactures was used as a base for estimating the shipments of non-respondents.

The total annual "value of shipments" of the non-respondents was seasonally adjusted for the quarter under review from pre-determined factors established from historical data available. Also, fabric distribution of the estimated shipments was calculated on the basis of the current reporting firms.

In analysing the response to this survey for the quarter under review, the "value of shipments" of the reporting firms, as reported on their 1965 Annual Census of Manufactures, has been related in total to the "value of shipments" of all manufacturers. The resulting percentages listed below therefore indicate the representation of the reporting firms to the complete industry in 1965.

Women's and Misses', 76.8%; Children's under 14, 69.5%; Men's and Youth's, 78.0%; and Boys' 78.3%.

GARMENT SHIPMENTS

EXPÉDITIONS DE VÊTEMENTS

Quarter Ended December 31, 1968

Trimestre terminé le 31 décembre 1968

This issue is the only release to be made for the year 1968 and summarizes, by quarter, the same selected items published previously in two installments in the D.B.S. Daily Bulletin. It is hoped that improved response by all manufacturers will enable the Bureau to reinstate the individual quarterly releases, during 1969.

La présente livraison est la seule qui sera publiée pour l'année 1968. Elle résume par trimestre les expéditions de certains articles d'habillement suivant la même répartition que dans les deux communiqués qui ont paru dans le Quotidien du B.F.S. Le Bureau espère que si les fabricants font preuve d'un plus grand empressement à répondre aux questionnaires, être en mesure de reprendre en 1969 la publication des rapports trimestriels.
